

## LARGE PORCELAIN SLAB COLLECTION

Stile® Large Porcelain slabs from NSG is the latest evolution of porcelain for home and commercial properties. These 6 and 12mm-thick porcelain panels are lightweight and suitable for a variety of design projects, including new installations and remodeling

projects. Available in 13 rich colors and organic textures that mimic the beauty of natural stone, Stile® Porcelain slabs complements a variety of design and architectural styles.

A Stile® Porcelain slab, which comes in two sizes 118"x59" and 126"x63" and weigh 2.81 and 5.8 pounds per square foot respectively, is significantly lighter and less costly than natural stone slabs and tile. Its lighter weight allows for easy installation and along with its price, makes for lowered project costs. Stile® Porcelain slabs are designed for quick installation over existing surfaces, which reduces the waste typically associated with installation.

Stile® porcelain slabs are nonporous, etch and stain resistant, and heat resistant, making the material suitable for a variety of kitchen and bathroom projects in both commercial and residential properties. Stile® Porcelain slabs are suitable, and often times superior, substitute for natural stone slabs and tile. Whether used to create focal walls, handsome floors, striking backsplashes, or lovely durable countertops,

Stile® Porcelain slabs provides the seamless look of continuous natural stone for a fraction of the cost of stone. Unlike natural stone, Stile® Porcelain slabs require no routine maintenance and because of their large formats are installed with minimal grout lines.

Stile® Porcelain slabs work almost anywhere a stunning surface is desired. This includes interior and exterior projects for both residential and commercial properties, as well as for aircraft, boats, and RVs.
